

Dear Hiring Manager,

My name is **Ravi Silva**, and I am a **Software Quality Assurance Analyst** with over three years of experience in technology, nearly all focused on **software quality and testing**. I hold a **Bachelor's degree in Systems Analysis and Development**, along with **postgraduate diplomas in Software Engineering (Quality & Testing)** and **Frontend Development**.

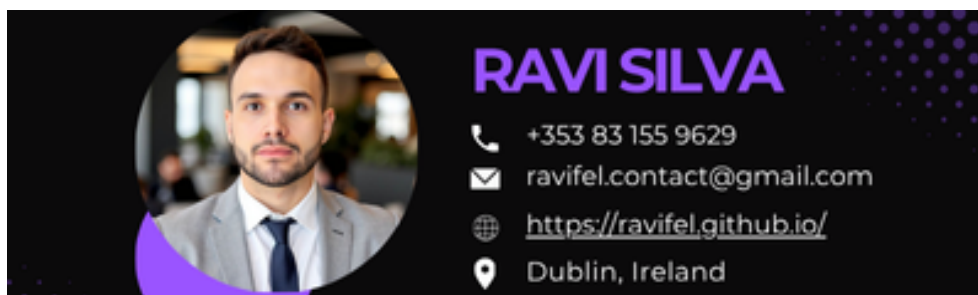

My career began in technical support and frontend development before I found my professional focus in **Quality Assurance**. Since then, I've built solid experience across **manual, functional, regression, and automated testing**, working with tools such as **Cypress (JavaScript)**, **Selenium WebDriver (C#)**, **Postman**, and **SQL**. I've collaborated in **Agile teams** using **Jira** and **Azure DevOps**, gaining a strong end-to-end understanding of the **software development lifecycle** and the importance of delivering reliable, user-focused products.

In **September 2025**, I relocated to **Ireland** to continue my professional and personal development through a long-term English and cultural programme. I'm currently based in **Dún Laoghaire** and available for **onsite, hybrid, or remote roles** across Ireland.

I'm a **detail-oriented, collaborative professional** with a strong passion for **quality, efficiency, and continuous improvement**. I would be delighted to contribute my technical skills and proactive mindset to your team.

Thank you for your time and consideration. I would appreciate the opportunity to discuss how my experience can support your organisation's success.

Kind regards,
Ravi Silva
